Profile Summary

- Results-driven Computer Engineering graduate (B.E. (Computer Engineering, 2026)) with proven hands-on experience in full-stack development, AI integration, and process automation. Built and deployed production-grade applications - including a real-time collaborative coding platform and an AI-powered job recommendation engine - using Python, JavaScript, React, Firebase, REST APIs, and Git-based workflows. Comfortable owing to the entire stack from UI to backend to deployment. Seeking a full-stack engineering role where I can ship user-facing products on a scale.
